

Test Document: IEEE Citation Scenarios

1. Introduction

This document tests the citation integrity checker with IEEE numeric citations. Each section demonstrates a specific citation integrity scenario.

2. Citation Scenarios

IEEE-01: MATCHED

IEEE numeric citation matches reference

In-text: Self-attention mechanisms have transformed deep learning (Vaswani et al., 2017).

Reference: [1] A. Vaswani et al., "Attention Is All You Need," NeurIPS, 2017.

IEEE-02: MATCHED

BERT - matches reference [2]

In-text: BERT introduced bidirectional pre-training (Devlin et al., 2019).

Reference: [2] J. Devlin et al., "BERT: Pre-training," ACL, 2019.

IEEE-03: MATCHED

GPT-3 - matches reference [3]

In-text: Recent advances demonstrate the power of scale (Brown et al., 2020).

Reference: [3] T. B. Brown et al., "GPT-3," NeurIPS, 2020.

IEEE-04: MISSING_REFERENCE

MISSING_REFERENCE: cited but no reference entry exists

In-text: This novel approach shows promise (NovelPaper, 2021).

Reference: <>

IEEE-05: UNCITED_REFERENCE

UNCITED_REFERENCE: Reference exists but not cited

In-text: Baseline methods remain relevant (TraditionalMethod, 2018).

Reference: [4] J. Smith, "Classical Methods," 2018. (Not cited in body)

IEEE-06: MATCHED

Multiple APA-style citations match references

In-text: Multiple papers demonstrate versatility (AuthorA, 2018) and (AuthorB, 2019).

Reference: [5] A. Author, "Paper A," 2018. [6] B. Author, "Paper B," 2019.

IEEE-07: STYLE_INCONSISTENT

STYLE_INCONSISTENT: Mix of APA and another style in same doc

In-text: Traditional (Johnson, 2018) and modern (ModernPaper, 2019) approaches coexist.

Reference: [7] R. Johnson, "Modern Methods," IEEE, 2018.

IEEE-08: MATCHED

GAN paper - MATCHED

In-text: GANs revolutionized generative modeling (Goodfellow et al., 2014).

Reference: [8] I. Goodfellow et al., "Generative Adversarial Networks," NeurIPS, 2014.

IEEE-09: MATCHED

ResNet paper - MATCHED

In-text: ResNet enabled deeper networks (He et al., 2016).

Reference: [9] K. He et al., "Deep Residual Learning," CVPR, 2016.

IEEE-10: MATCHED

Survey paper - MATCHED

In-text: Transformer variants continue to evolve (SurveyAuthors, 2023).

Reference: [10] Various Authors, "Survey of Transformers," ACM Computing Surveys, 2023.

3. References

Only properly formatted references below:

[1] A. Vaswani et al., "Attention Is All You Need," NeurIPS, 2017.
